FRIENDLY PARTNERSHIPS
SUSTAINABLE DEVELOPMENT

Dear Valued Clients - Authorities - Partner+...

We - A Chau Environment Co., Ltd would like to express sincere gratitude and appreciation to all our Clients - Authorities - Partners+ etc. for your continued support and the trust you put in our services from the beginning and throughout the last 15 years!

This milestone is not too long for other professions, but for us - **in the first days We entered the business from the collection of scraps/wastes in the Textile and Garment Industries** to today, it is a journey that cannot be counted with all the efforts, direct and indirect contributions of the entire workforce through the periods.

Based on reusing and recycling textile scraps in the Garment industry, We have built value-added products in the Vietnam market and neighboring countries.

After years of pursuing zero waste to landfill and promoting value-added solutions for "Waste materials", We have **provided solutions to turn "Wastes into Resources" (from production waste, landfill waste, etc.), creating valuable reusable and recycled products on the market, and especially "Non-recyclable or low-value waste" - after segregation, "Waste materials" are processed into alternative fuel in a cement factory.**

We're proud to engage with Organizations, Associations, Authorities, Partners, and others in the industry framework to build a circular economy and work together to minimize greenhouse gas emissions in Vietnam.

The aforementioned "Waste" value-added chain has also indirectly opened up possibilities and contributed to sustainable livelihoods as well as workers with jobs in their homeland.

Furthermore, over the years of collaboration, We have prioritized adding value to our Clients through specific actions such as diversification, digitization, and optimization of comprehensive environmental solutions to **become the first company Clients choose when using environmental services.**

For **our mission of "Accompanying Clients"**, We will strive for deeper participation and cooperation with all intra-industrial and inter-industrial Agencies - Organizations - Enterprises - Individuals - etc.

Once again, We - A Chau Environment would like to express our gratitude and wish you ever-growing, prosperous and ever-reaching!

Warm regards!

Director

Nguyen Thanh Dung

MILESTONES OF FORMATION & GROWTH

Origins (Predecessor)

Purchasing scraps, by-products, and inventory from the garment/-textile sector

Textile-industry scraps and off-cuts from cutting and sewing;

Fabric rolls, raw materials, surplus supplies, ...

Contracting for other factory scrap streams such as paper, plastics, metals, textile spools, ...;

2009 2014

The first product in the journey of adding value to "waste": Industrial wiping rags – recovered from textile off-cuts, cut and sewn for direct reuse.

2009

A Chau Environment was established. Lines of business: environmental consulting, waste treatment, and scrap purchasing.

2010

Established the Thua Thien Hue Branch; in Ho Chi Minh City, began hazardous-waste transportation.

2011

Launched the Recycling line, with the first product being industrial wiping rags – recovered and directly reused (cutting, stitching) from textile off-cuts reclaimed from production waste.

2012

Became a waste-transport agent of HCMC Urban Environment One Member Co., Ltd (Citenco)

2013 - 2014

Adopted ISO 9001:2008

2015 2020

Promoted the "Zero Landfilling" solution and service-policy transparency

2015

Providing co-processing waste solution in cement kilns

2016

Tien Giang Branch officially commenced operation as a waste transfer station serving the Mekong Delta

2017

First public release of the online environmental-service price lookup system; Published the first edition of the Environmental Handbook – Guidance on Environmental Management

2018

Implemented the "Environmental Health Care" program (surveys, consulting, and compliance assessment in environmental management).

Piloted "For a Non-Landfilling City": operated waste segregation and end-solution provision after separating industrial waste from residential sources in Binh Tan and Tan Phu districts;

Adopted ISO 9001:2015.

2019

Offered integrated environmental-service product packages; researched and piloted pre-processing technology lines (dismantling, cutting, shredding) for industrial waste

2020

Cooperation network reached 10+ Partners, 100+ Contractors, 10,000+ Clients, and established nationwide transport and distribution networks

2021 Present

Upgraded service quality and customer/partner platforms; expanded exports, project networks, waste "processing points" stations nationwide.

2021

Upgraded the online quotation system.

#COVID-19

During COVID response, repurposed the transport fleet to social-support roles (e.g., "Zero-cost agricultural convoys"), connected farming regions to outbreak areas; supported supply of sanitizer alcohol and partnered in waste collection and transport within centralized quarantine zones.

2022

Official release of the MTAC+ environmental application (Customer Portal) on Google Play and App Store.

Implemented projects for environmental communication days, waste sorting, recovery, recycling & sustainable treatment, in collaboration with local authorities and organizations: battery take-back, recycling of milk cartons, "trash-for-gifts" drives.

Rolled out the Green Schools program—communication and post-segregation collection from schools.

Developed pesticide-packaging take-back and treatment solutions aligned with new-rural environmental criteria.

2023

Established the Ben Tre Branch; signed and cooperated with export partners; promoted circular economy and projects on recyclables recovery/separation, MSW and landfill projects in HCMC, Tien Giang, Kien Giang, Tay Ninh, Hue, and northern provinces.

2024

Established the Tay Ninh Branch;

EPR solutions and implementation for producers/importers

Adopted digital signatures and e-contracts.

GUIDING VALUES

VISION – MISSION – MOTTO – CORE VALUES

VISION

Being the first company that Clients choose when using environmental services

MISSION

Accompanying Clients

MOTTO

Friendly Partnerships – Sustainable Development

CORE VALUES

Be Friendly to Be Happy **Create** to Differentiate **Discipline** Drives Success
Professionalism is Vital **Integrity** Builds Strength

OUR DIFFERENTIATORS

What Sets A Chau Environment (MTAC) Apart?

15+ years of experience

... in the environmental sector; providing “co-processing waste” solutions since 2015. Since 2020, A Chau Environment has pre-processed and supplied more than 10,000 tons per month of Alternative Fuels/Raw Materials (AFR). ...

Ensured Waste-Treatment Partner Network

By cooperating with A Chau Environment (MTAC), Clients can proactively select waste-treatment solutions with Partners — comprising leading licensed waste-treatment operators and top cement plants.

Zero-Landfilling Solutions

Waste received from our Clients is guaranteed to be transferred to Partners—leading licensed waste-treatment operators in accordance with current regulations. In this regard, A Chau Environment (MTAC) provides “Recycling” and “Co-processing” solutions for waste—thorough, closed-loop, and moving toward minimizing the amount of waste sent to landfills.

Offices and Warehouse System

Offices and warehouse systems are located across the Northern – Central – Southern regions to serve Clients and Partners; our strength is a logistics network via road and inland waterway, meeting service frequency and enabling rapid execution at localities

Capacity

Capability to receive and treat waste in unlimited quantities.

10,000+ Clients

Practical consulting and implementation experience for 10,000+ Clients of diverse sizes and industries; solutions tailored to local conditions, specific requirements, and brand standards in Viet Nam and internationally.

Data Digitization via the MTAC+ Application

Since 2023, the MTAC+ application officially serves to digitize, provide, store, and retrieve information and service-delivery progress, accompanying Clients before – during – after cooperation.

Online Quotation and Automated Environmental Reports/Dossiers

Tools developed by A Chau Environment.

E-Contracts and Digital Signatures from 2024

In partnership with Clients and Partners, we save time, reduce printing, dispatch, and administrative procedures, and other costs in the digital-transformation trend. By reducing paper, ink, and printing activities, we indirectly contribute to greenhouse-gas mitigation and the rational use of resources and energy.

NETWORK

HUMAN RESOURCES - PHYSICAL ASSETS - PARTNERSHIPS

Waste Treatment Owners; Reusing/Recycling Partners; Cement Factories; Trade - Export Partners,...

WASTE PRE-PROCESSING POINTS – SORTING, BALING, ...

Projects related to solutions for municipal solid waste and landfills – segregation, recovery, recycling, ...

The display of borders and simulation of maps of other countries on the product is for visual illustration purposes only.

ORGANIZATIONAL STRUCTURE

CHẤT THẢI CŨNG LÀ TÀI NGUYÊN

Waste as a **Re**source

Industrial, hazardous, and municipal waste with low recycling value or no longer recyclable is processed into alternative raw materials and fuels for the cement manufacturing process.

LINE OF BUSINESS

Details

SCRAPS

Buying package of scraps, waste & inventory of garment, textile, backpack, bag,... from the factory

WASTES

Consulting, designing solutions and directly providing package services: management, transportation, waste treatment (hazardous, industrial, domestic,...); Destruction of goods; EPR solutions;...

REUSE & RECYCLING

Directly reusing materials from waste, trading reused/recycled products (wiping cloths); Supplying reusable/recyclable raw materials; Pre-processing and providing waste as input material for factories applying co-processing technology.

CONSULTING

Legal consulting & designing on environmental solutions; Package implementation: monitoring, implementation of records/reports, environmental procedures; Training, coaching on environmental management;...

WASTEWATER

Construction, renovation, operation and maintenance of wastewater treatment system; Supplying materials, equipment, microbiology - chemicals,...; Modular water treatment systems

View more at our website: www.moitruongachau.com

SCRAPS

Production scraps: leather, textile off-cuts, paper, plastic, nylon, ...
Fabric rolls, leftover fabrics, garment accessories, ...

FULL-SERVICE CONTRACTOR

For scrap, waste & inventory of all kinds of garment, textile, backpack, handbag, etc. industries from factories

With the need to expand the supply of raw materials to serve the development of environmentally friendly recycled, reused products, etc., we look forward to working with textile and garment enterprises: bags, leather shoes,... nationwide to purchase scrap in the production process in unlimited quantities.

Bidding capacity:

Full package bidding for all types of scrap and waste, with no volume limit nationwide.

Legal capacity:

Meet requirements when providing services of classification, collection, transportation, recycling, treatment,...

Support for export processing enterprises and customs procedures:

Consulting and supporting customers with documents, procedures,...

Undertake full-package contracts

for all types of scraps and production waste, providing the best cost balance for factories.

Compliance control and data reporting:

Services provided are digitized and controlled by the MTAC+ application

Environmental consulting:

Consulting and supporting Clients in resolving related dossiers and environmental procedures.

Supporting the textile industry's sustainability and "greening" objectives:

Sorted, collected, and transferred to a network of approved recycling partners. The remaining waste is treated with a non-landfill and non-incineration solution without energy recovery.

Some categories of scraps:

- Textiles: off-cuts, fabric rolls, leftover fabrics, garment accessories, inventories, ...
- Paper-based group: cartons, paper cores, scrap paper, carton sheets, kraft, ...
- Plastic-based group: nylon, plastic bottles, PE films, etc.
- Rubber-based group: soles, EVA, leftover rubber, etc.
- Others pallets, ...

SOLUTIONS FOR SUSTAINABLE WASTE MANAGEMENT

Research, apply solutions that are beneficial to the environment, towards limiting and replacing waste landfill.

“ZERO LANDFILLING”: FROM THE TIME OF GENERATION UNTIL THE WASTE IS RECYCLED AND TREATED

Analyze waste samples on request to determine composition, characteristics, ... or to determine hazardous components in waste for classification and management

WHY CHOOSE A CHAU ENVIRONMENT'S WASTE SOLUTIONS?

SCAN ME

REUSE & RECYCLING

END-TO-END SOLUTIONS

We provide specialized solutions to support goals of increasing reuse and recycling rates, reducing emissions, and achieving zero landfill. Our services include consulting, communication for source segregation, and full-cycle execution – from recovery, collection, transport, pre-processing to certified recycling – in partnership with leading recycling providers.

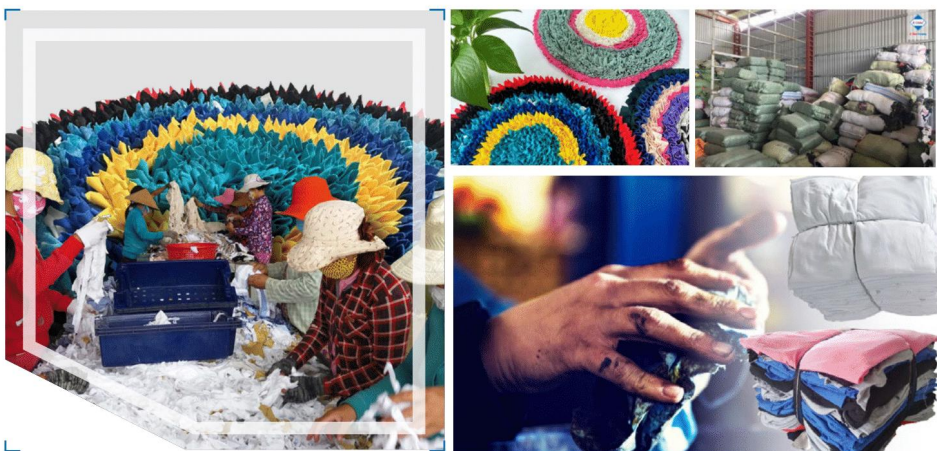

- We act on behalf of our clients to select suitable recycling solutions, ensuring legal compliance and operational capacity for all transferred waste, by-products, and goods;
- The entire waste flow is monitored and audited for compliance and data transparency through MTAC+ Environmental Management Platform;
- With over 16 years of experience in end-to-end scrap management for factories and more than a decade serving supply chains in apparel, footwear, backpacks, and handbags, we are trusted by leading brands in meeting their environmental commitments;
- Our recycling capabilities cover a wide range of materials: textile waste, garment scraps, paper, plastic, metals, cartons, used oil, batteries, glass, flexible packaging, and more – scalable to meet diverse Client and Partner needs;
- We also implement community-based communication programs to promote waste sorting, recycling, and product recovery – working hand-in-hand with brands and manufacturers to close the loop.

FROM SOURCE SORTING

TO CERTIFIED RECYCLING

INDUSTRIAL WIPING RAGS – REUSABLE PRODUCTS FOR EXPORT TRADE

PROVIDING RECYCLING SOLUTIONS FOR DEFECTIVE PRODUCTS AND SCRAPS FROM THE GARMENT, FOOTWEAR, BACKPACK, AND HANDBAG INDUSTRIES

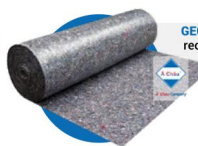

CERAMIC & HANDICRAFT

PADDING MATERIALS
Non-recyclable foam types:
paper-laminated foam,
fabric-laminated foam, shoe
insoles, EVA soles

data report, ...

3

Traceability, accountability
& compliance

IMPLEMENTATION DETAILS WITH THE PARTIES

Consulting Producers/Importers/Brands (referred to as Clients) on comprehensive solutions; responsible for organizing implementation so that Clients can implement EPR regulations and environmental goals; Providing "waste" materials of domestic origin, meeting recycling standards, of Partners - Recycling Plants.

Transport network - Human resources – Partner network: proactively organize and implement nationwide. Our Partners are recycling factories that meet standards, capacity and legal profiles in accordance with regulations.

Separating and pre-processing (cutting, crushing,...) "waste" raw materials, accompanying the Parties to ensure the volume and rate of recovery and recycling.

Data is managed on software, publicly available, in accordance with EPR regulations.

Accompanying Clients in strengthening of environmental communication towards product take-back programs, classifying waste at source, sustainable recycling and waste treatment,...

Serving the goal of reducing GHG, responsible and sustainable waste management.

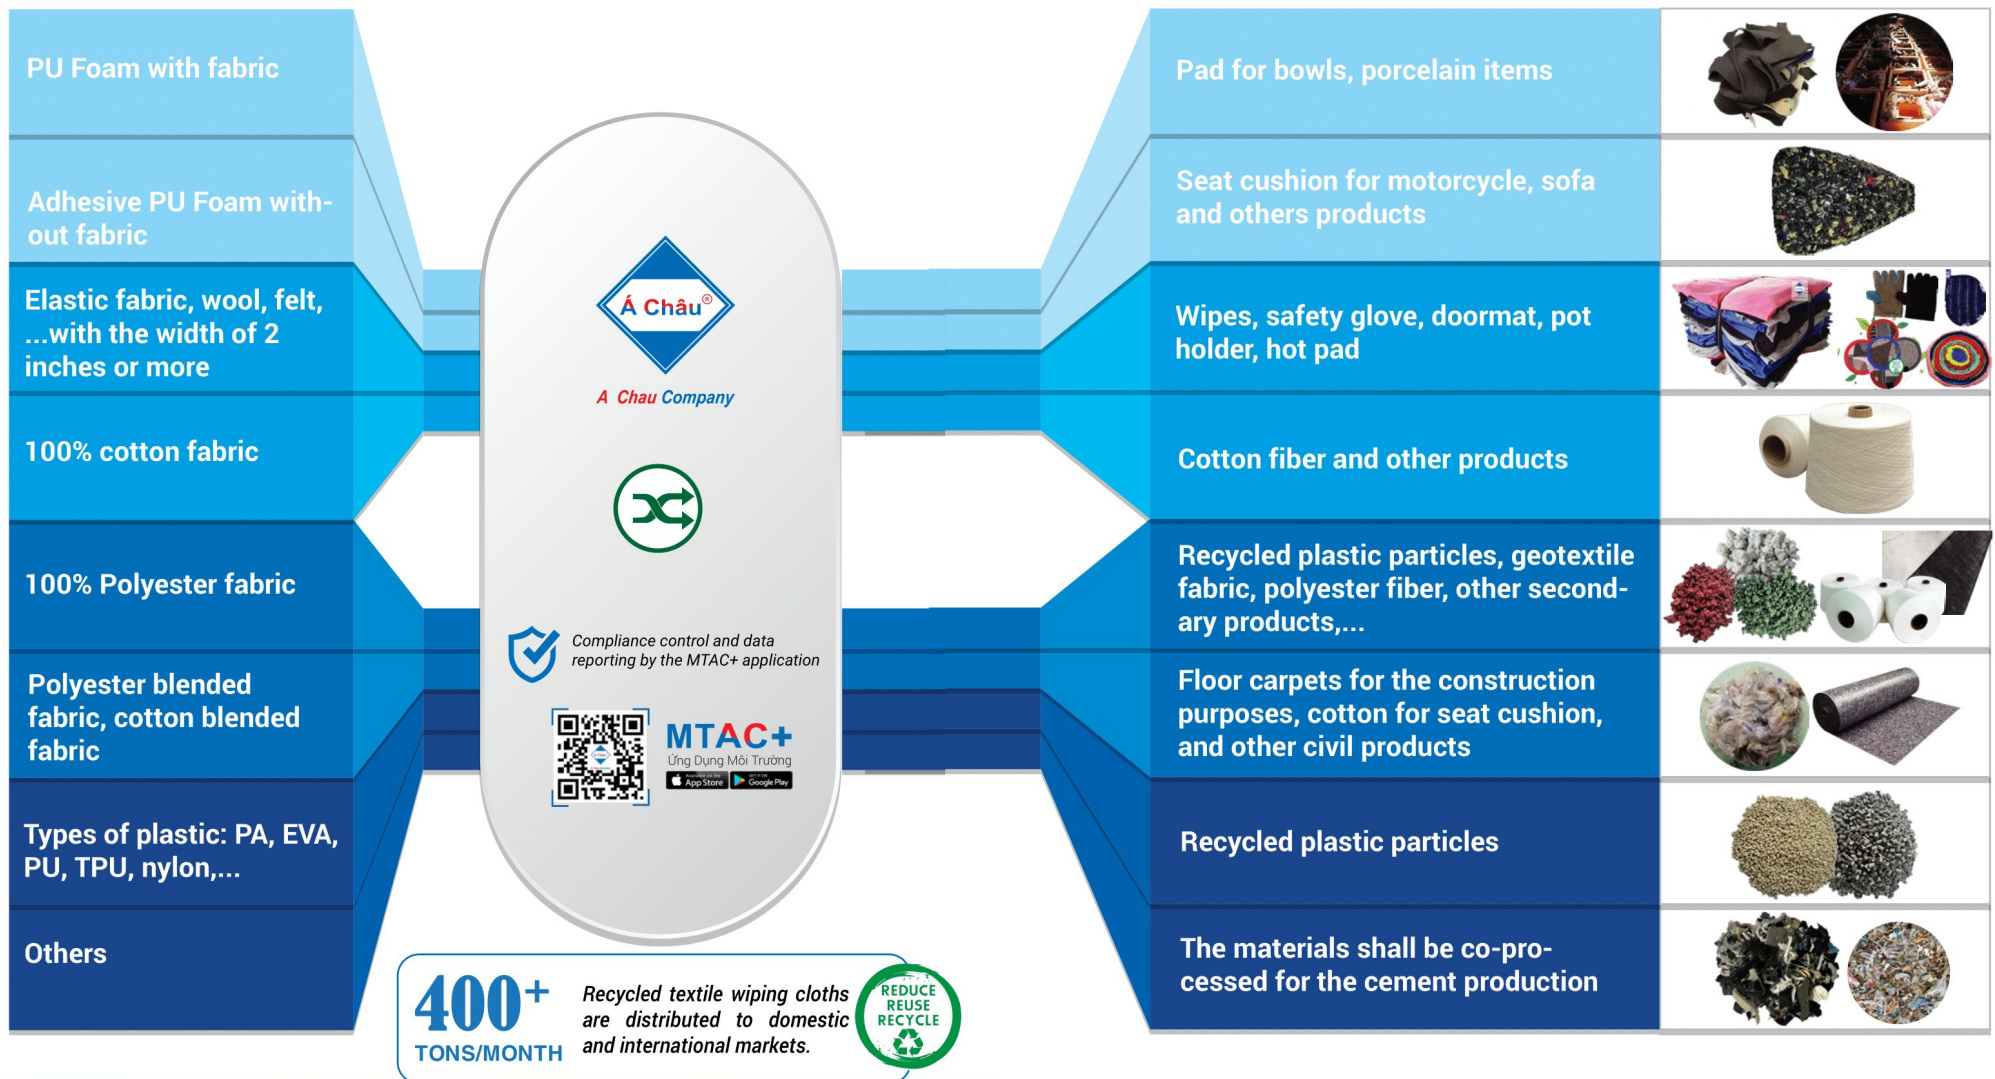

CÁC GIẢI PHÁP TÁI CHẾ ĐANG CUNG CẤP

reused and recycled into new products

PRE-PROCESSING AND PROVIDING WASTE MATERIALS AS ALTERNATIVE FUELS, CO-PROCESSING FOR INDUSTRY (CEMENT, STEEL, POWER PLANT, ...)

END-TO-END SOLUTIONS FOR LOW-VALUE, NON-RECYCLABLE WASTE

01

Single-use plastic products

02

Inorganic components in domestic waste from landfills: styrofoam boxes, plastics, plastic bags, bottle labels, lids, cake/candy wrappers,...

03

Production waste from industries: garment, leather shoes, backpacks and bags; paper recycling, plastic and wood recycling industry; ...

04

Ocean plastic wastes: plastic bottles, nylon, fishing nets, fishing gears,...

05

Sludge, ash, slag,...

06

Agricultural plastics: used packaging of pesticides, greenhouse films, ...

TECHNOLOGY SOLUTIONS & EQUIPMENT LINES FOR PRE-TREATMENT OF DOMESTIC AND INDUSTRIAL WASTE (MINING, SEPARATION, DESTRUCTION, CUTTING, CRUSHING)

Providing consulting and solution design, installation, and operation of standardized waste cutting and shredding technology lines;

Collaborating in receiving processed waste-derived raw materials and fuels, and supplying them to recycling partners or end-use cement plants

PROVIDING FUEL/RAW RESOURCES FROM "WASTE" ACCORDING TO PARTNERS' REQUESTS, SERVING

Reuse, recycle;

Alternative fuel/ Co-processing waste in cement factories;

Export or other handling activities,...

Why choose "Co-processing of waste" in cement kilns?

Taking advantage of existing cement kilns, waste is burned at temperatures ranging from 1,450 degrees Celsius up to 2,000 degrees Celsius. High and stable temperature, the oxidizing environment with a long combustion time, allowing destruction thorough waste. Emissions generated during the combustion process are completely eliminated and controlled by an automatic monitoring system.

The remaining ash will be mixed with clinker to produce cement without generating other pollution. The waste receiving capacity of cement factories has huge potential.

Non-recyclable or low-value waste continues to circulate "second life" instead of landfill solutions. Creating a value chain linking units in implementing EPR as well as efforts to reach Vietnam's net zero emissions target by 2050. Contributing to improving the credibility and brand of localities, businesses, organizations, brands, etc. in the application of green technology, the circular economy, and sustainable development.

10.000+
TONS/MONTH

Waste to be co-processed since 2020: Industrial waste of rags, leather and shoes; Hazardous waste (rags,...), agriculture (pesticide packaging); Inorganic domestic waste; landfills; Sludge; Ash and slag, gypsum; Plastic waste (low recycling value),...

ENVIRONMENTAL LAW, COMPLIANCE CONSULTING

With the vision of becoming a trusted legal advisor and provider of integrated environmental solutions, A Chau Environment continuously strives to be a reliable partner for clients, businesses, organizations, and individuals. We deliver approaches and solutions for environmental management that are effective, cost- and time-efficient, compliant with legal requirements, and aligned with the long-term production and business objectives of enterprises operating in Vietnam.

Consulting, designing environmental management solutions;
 Providing comprehensive services on monitoring, implementation of dossiers/reports, legal procedures related to environmental regulations;
 Supporting staff to give legal advice to assist the factory in preparing for environmental inspection and assessment;
 Legal training on environmental management;
 Consulting and assessment services on compliance with environmental regulations;
 Consulting on solutions and organizing the implementation of extended producer responsibility - EPR;
 +...

ENVIRONMENTAL DOSSIERS & LICENSES

Environmental Impact Assessment (EIA) Reports;
 Environmental permits and registrations;
 Pilot operation reports for environmental protection works;
 Hazardous waste identification records;
 Water resource licensing;
 Occupational environment monitoring records;
 Other environmental procedures and documentation: waste incident response plans, eco-label certification, etc.

PERIODIC ENVIRONMENTAL REPORTING

Annual environmental protection report
 Water resource exploitation report

Supporting Customers, Partners, ... to conduct environmental reports, sustainable development, Environmental, Social and Governance (ESG) reports, ...

ENVIRONMENTAL MONITORING & SAMPLE ANALYSIS

Water quality analysis (77+ criteria)
 Wastewater and exhaust gas analysis (40+ criteria)
 Soil analysis (30+ criteria)
 Sludge analysis (for hazardous or non-hazardous classification)
 Waste analysis (for hazardous or non-hazardous classification)
 Occupational environment sampling and monitoring

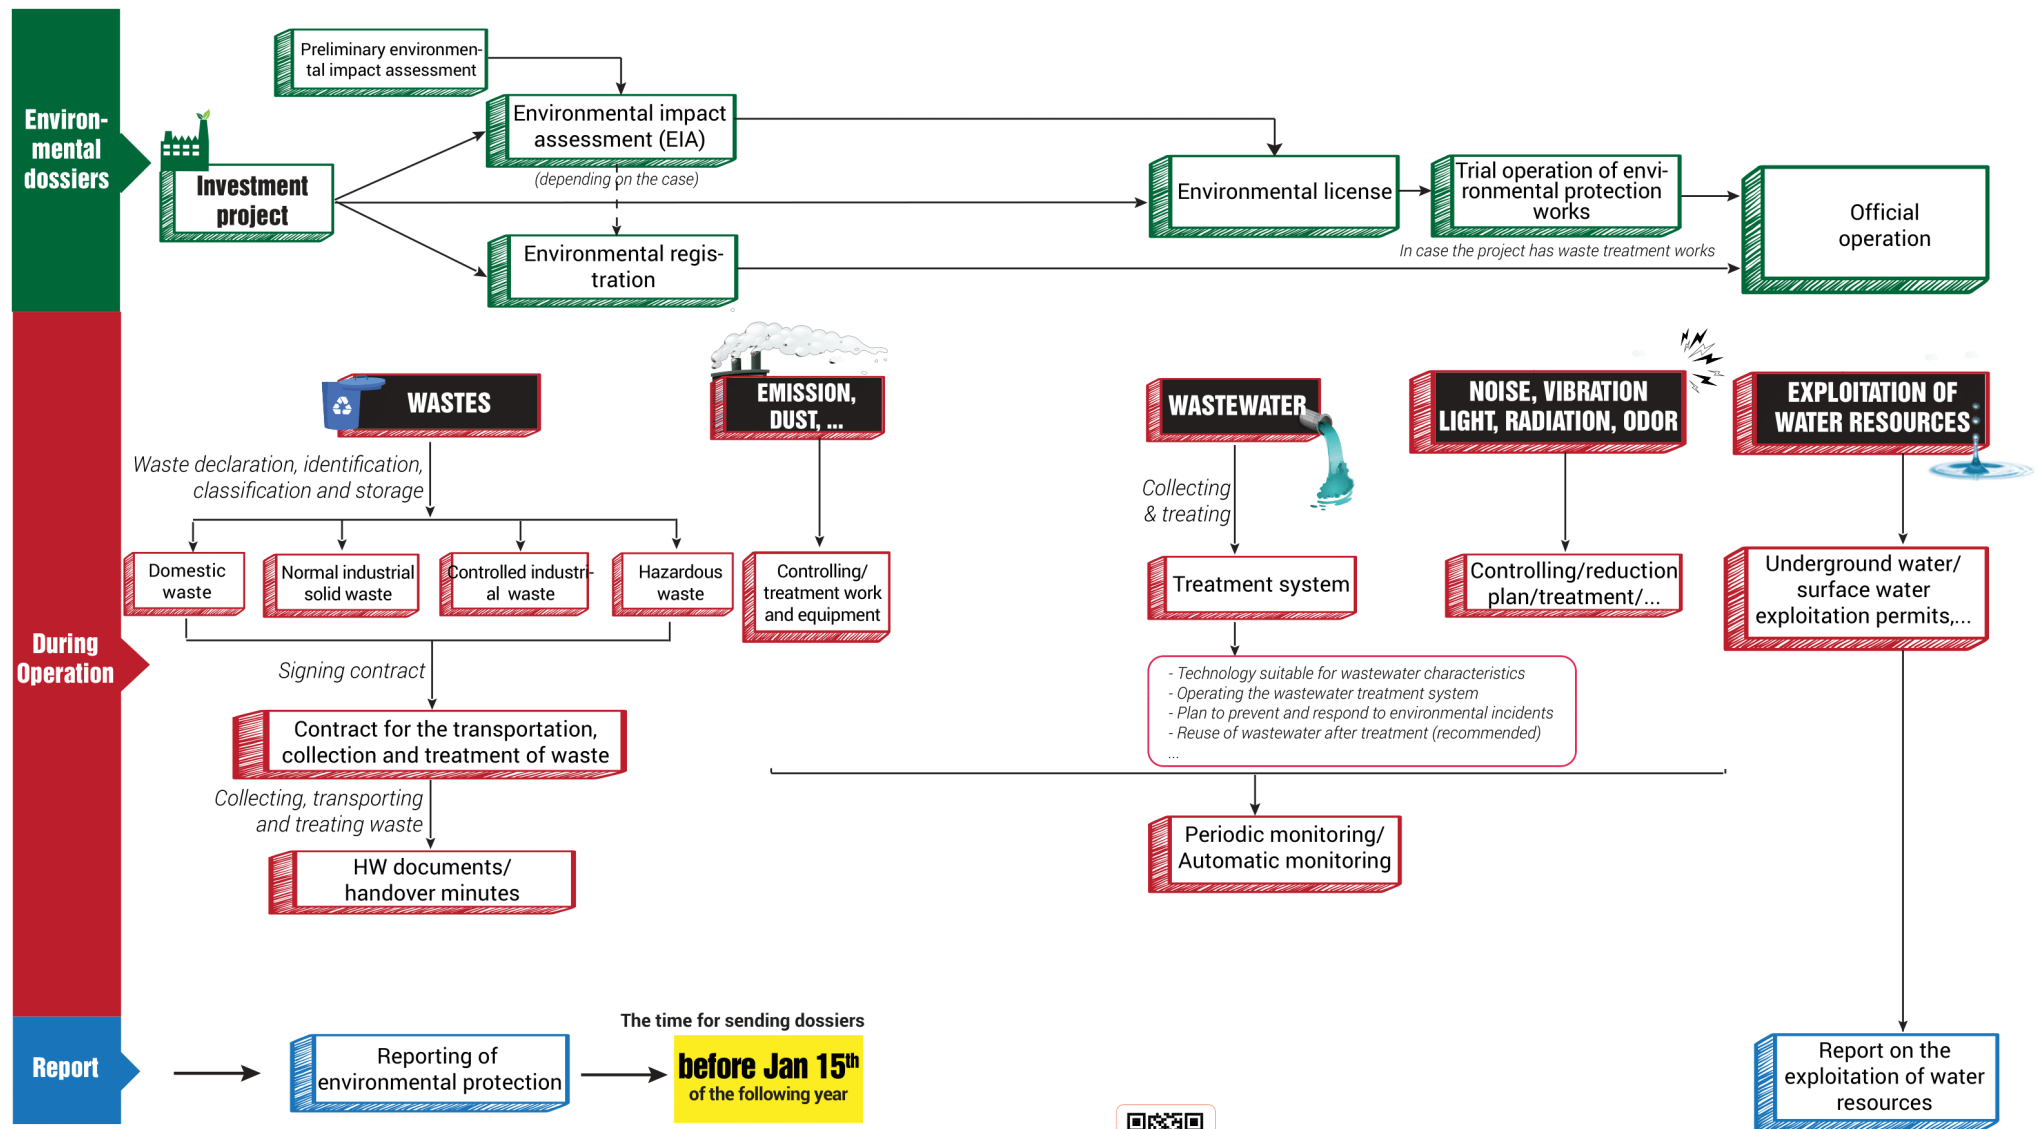

CONSULTING & COMPLIANCE ASSESSMENT SERVICES

Partnering with clients in conducting inspections, audits, and compliance assessments on environmental management;
 Ensuring conformity with legal requirements, while helping clients meet standards for production, safety, and sustainable operations;
 Training and capacity-building programs on environmental management and compliance.

REGULATIONS ON ENVIRONMENTAL MANAGEMENT

Notes: Depending on current regulations, types of waste, operation situation, production - business demand, enterprises would be required or encouraged to implement the below records/procedures. The handbook provides only reference information and cannot replace the regulations specified in the legal documents issued

COMPREHENSIVE WASTEWATER TREATMENT SOLUTIONS

Consulting, designing, and providing “comprehensive healthcare solutions” for wastewater treatment systems, accompanying clients in production and business operations.

Construction and upgrading of wastewater treatment systems;
 Operation and maintenance of wastewater treatment systems;
 Modular wastewater treatment systems;
 Supply of microorganisms, chemicals, materials ... for treatment;
 Specialized environmental consulting and legal compliance support;
 ...

Why Choose A Chau Environment?

Ensuring output water quality and compliance with environmental standards;
 Providing clients with “healthcare solutions” for treatment systems and technical design to ensure stable operations;
 Designing for optimal space, cost-efficiency, and system effectiveness;
 Supporting legal documentation and procedures related to wastewater.

CONSTRUCTION, UPGRADE, OPERATION & MAINTENANCE OF WASTEWATER SYSTEMS

Consulting, designing, and implementing construction, upgrading, operation, and maintenance for domestic, industrial, and utility water treatment systems.

Guaranteeing stable water quality and reliable operation while saving time and costs, ...

MODULAR WASTEWATER TREATMENT SYSTEMS (MODULE-ACE)

The modular wastewater treatment system (Module-ACE) developed by A Chau Environment is designed for compact size, ease of installation and operation, low space requirements, and cost savings. Most importantly, it meets water quality standards with treatment capacity up to 30 m³/day-night.

Module-ACE Wastewater Treatment System is suitable for:

Restaurants, hotels, F&B outlets;
 Factories and production facilities with fewer than 500 employees;
 Apartments, residential buildings;
 Clinics, healthcare facilities;
 ...Other facilities discharging wastewater under 30 m³/day-night.

TECHNOLOGY-DRIVEN SOLUTIONS

MTAC+ via Website

MTAC+ — Available on
Google Play & App Store

Driving digitalization in environmental management

Developed by A Chau Environment Co., Ltd, the MTAC+ Environmental App – Customer Portal is a digital platform for managing environmental data, contracts, waste collection schedules, invoices, service requests, and more. MTAC+ is a pioneering tool in Vietnam that connects businesses, partners, organizations, and individuals, enabling transparent information sharing, seamless coordination, and sustainable solutions across industries.

Online environmental quotation portal:

A user-friendly interface with simple operations, supporting sample quotation/contract generation and itemized transparency. Available 24/7 to save time and accompany clients in selecting and making effective decisions, with a strong commitment to transparency and continuous professionalization in enhancing customer experience.

Online Environmental Quotation Portal

ENVIRONMENTAL COMMUNICATIONS

Providing end-to-end solutions: From program design and content development to communication, awareness campaigns, waste recovery, recycling, and final treatment – we provide end-to-end solutions that are both effective and measurable.

We partners with government agencies, organizations, schools, businesses, and communities to drive impactful environmental communication, promote source segregation, and implement responsible, sustainable recovery and recycling programs – ensuring long-term results at the grassroots level.

ENVIRONMENTAL PROGRAMS

We design and deliver impactful programs that inspire sustainable practices:

- Implementing waste segregation at source;
- Organizing event series such as “Trash for Gifts” and “Green Living Festival”;
- Running recovery campaigns for used batteries, milk cartons, second-hand clothes and books;
- Promoting Green Schools and School Recycling Culture;
- Offering training and knowledge-sharing on environmental management and legislation;
- Seminar: “New Rural Development” with pesticide packaging collection and treatment.

ONLINE COMMUNICATION NETWORKS

- Website
- Mobile App
- Social Media Channels (Facebook, YouTube, ...)

COMMUNICATION MATERIALS & PUBLICATIONS

We develop practical and engaging tools such as environmental handbooks, training materials, educational comics, and eco-friendly products from recycled and reused resources, supported by multi-channel communication platforms.

SUSTAINABLE DEVELOPMENT

ENVIRONMENTAL PROJECTS - ACCOMPANYING THE COMMUNITY

SOCIAL RESPONSIBILITY

CORE VALUES

CORE VALUES – SOCIAL RESPONSIBILITY

CLIENTS

"Being the first company that Clients choose when using environmental services."

We are committed to delivering sustainable values by designing solutions for environmental management activities and service provision. Clients' trust is the foundation and driving force that guide us through every stage of corporate development.

EMPLOYEES

"The right people are the most valuable asset."

A Chau Environment builds a strong foundation by fostering organizational development in compliance with laws, ensuring employee rights and benefits, health and safety, while supporting the growth of each individual's capacity.

PARTNERS

With the philosophy **"Friendly Cooperation – Sustainable Development"**, A Chau Environment respects and values every partnership. We seek deep collaboration with agencies, organizations, and individuals, both domestic and international, working together in implementation, sharing benefits, and creating long-term values for all stakeholders.

COMMUNITIES

A Chau Environment integrates environmental initiatives with social goals, sharing values with local communities through diverse activities such as green stations, collaborative projects, and community-driven campaigns for environmental protection.

CONTRACTORS

A Chau Environment recognizes contractors as an indispensable link in service delivery. All workers are trained to ensure compliance with environmental standards, legal requirements, and to guarantee occupational health and safety in every operation.

ENVIRONMENT

A Chau Environment ensures that all services comply with environmental regulations, meet customer commitments, and are strictly monitored by internal systems. Our diverse environmental solutions contribute to reducing waste, promoting recycling, and advancing sustainable circular practices.

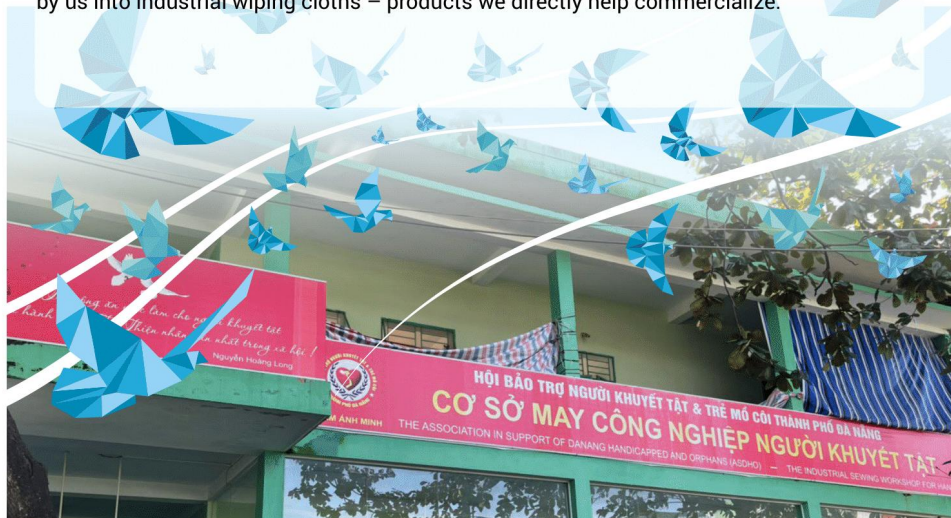

ENVIRONMENTAL AND SOCIAL RESPONSIBILITY

***“Empowering people with disabilities through employment
is the most humanitarian charitable act in society!”***

Nguyễn Hoàng Long, Chairman of the Da Nang Association for the Support of People with Disabilities and Orphans

From discarded fabric to new value – every scrap recovered creates jobs, reduces waste, and brings benefits to both the environment and society. This journey fuels us with positive energy to keep searching for the best fabric scraps, ensuring that the values we build together last through time. We call them **“Green Pieces”** – fragments of love and sustainability, endlessly connecting and spreading.

In this program, hearing-impaired workers are trained in sewing, turning fabric scraps provided by us into industrial wiping cloths – products we directly help commercialize.

Trung Tâm Giáo Dục Nghề Nghiệp cho Người khuyết tật và Trẻ mồ côi TP. HCM

VOLUNTARY BLOOD DONATION

Since 2017, in our role as a companion organization, we have proudly organized biannual blood donation drives, an act of compassion for the community and a step toward healthier lives for everyone.

We join hands with Clients and Partners to spread the spirit of giving and amplify its meaningful impact.

TOGETHER FOR THE COMMUNITY

We are proud to join hands with Partners, Clients, Benefactors, and our dedicated Employees to bring care and support to children and communities in remote areas – creating lasting values of compassion and sustainability.

Nguồn: Môi Trường Á Châu (Ngày 10/11/2020)

Environmental Communications

We design and deliver environmental communication programs – from waste segregation guidance to interactive eco-games – in partnership with the Women's Union, Youth Union, schools, and communities. Beyond raising awareness, we drive real action through waste recovery, regular collection, and sustainable long-term practices.

Environmental Communications in Action

BUILDING SCHOOLS THAT ARE

FRIENDLY

& SUSTAINABLE

DEVELOPING COMMUNICATION MATERIALS ON ENVIRONMENTAL PROTECTION

Environmental communication campaigns
Waste segregation guidelines
Guidance on carton recycling and collection
Environmental games and activities

ORGANIZING COLLECTION PROGRAMS:

- ✓ Used milk cartons
- ✓ Aluminum, plastic, paper, and other recyclable packaging
- ✓ Used clothes, old books, and notebooks

GREEN SCHOOL PROGRAM

COLLECTION PROGRAM FOR CARTON RECYCLING

Little Hands - Small Steps, Big Impact - Green Future

LOOP STATION RECOVERY NETWORK

A program to establish a nationwide network of recovery and recycling stations serving community environmental activities, with the goal of setting up stations across the country.

The program is designed for agencies, organizations, schools, associations, and all individuals who care about and are committed to environmental action.

house of waste batteries

More details:

Program Impact (2022–2024):

2 MILLION

Viên pin thải được xử lý an toàn cho môi trường

100+ “battery houses”

built from recycled materials

Clothes recovered for donation or recycling; Notebooks, storybooks, and other learning materials shared and contributed by the community;...

20 MILLION

milk cartons collected and separated from municipal solid waste (equivalent to over 200 tons);

USED BATTERY COLLECTION & TREATMENT – SAFE & RESPONSIBLE

Step 1: Separate & Store Safely

1

Batteries must be classified separately and stored immediately at the point of generation (individuals, households, etc.), placed in paper boxes, cartons, or plastic bottles with sealed lids, kept in dry, ventilated places, and out of children's reach.

Step 2: Handover to Authorized Units/Organizations

2

Individuals and households hand over used batteries to authorized collection units/organizations or local government authorities (neighborhood groups, wards, communes, etc.)

Step 3: Collection, Transportation & Transfer to Authorized Partners

3

Used batteries, once collected, are delivered to designated end-point partners or licensed treatment facilities within the network of A Chau Environment.

Step 4: Safe Final Treatment

4

Used batteries are treated in a closed-loop system, ensuring no secondary environmental pollution, in compliance with current waste management regulations.

Community Campaigns for Waste Segregation

**SOURCE SEGREGATION FOR WASTE TO BE REUSED, RECYCLED,
AND TREATED IN AN ENVIRONMENTALLY BENEFICIAL WAY**

300+

Communication programs, environmental festivals, green living campaigns, "Trash-for-Gifts" initiatives; communication on waste segregation, new rural development programs; Green School campaigns – promoting recycling culture in education, ...

100+ TONS

Waste (plastic bottles, aluminum cans, milk cartons, used batteries, etc.) is segregated, recovered, recycled, and treated through non-landfilling community-based solutions.

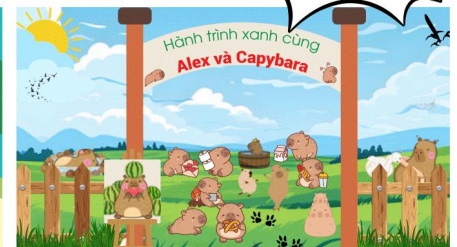

100.000+

Eco-friendly products derived from reuse and recycling are exchanged and promoted to encourage green consumption
